MESSAGE

FROM CHIEF EXECUTIVE

遠洋集團董事局主席、
行政總裁李明

LI MING

Chairman of the board of directors
and Chief Executive Officer of
Sino-Ocean Group

首先，我謹代表遠洋集團向 2020 年初在“新冠疫情抗擊”過程中去世的人們表示哀悼，並向在這次疫情中失去親人的人們表示慰問。此外，對在嚴峻環境中奮不顧身投入疫情抗戰一線以及相關危險工作的人們致以衷心的感謝和祝福。遠洋集團已在第一時間通過遠洋之帆公益基金會設立“抗擊新冠肺炎專項基金”，通過資金支持、物資支持等方式定向用於湖北武漢等多地的疫區前線抗擊及防治工作，對有可能引發的次生災害，向一線提供堅強支持，對受困者群體予以持續性的跟進和關懷，為疫情後期問題處理提供幫助。我們希望這次疫情可以盡快過去，人民生活恢復美好健康。

First of all, on behalf of Sino-Ocean Group, I would like to express my deepest sorrow for those who died during the “fight against the COVID-19 pneumonia pandemic” in early 2020 and convey the condolences to those who lost their families during this epidemic. In addition, I would like to express my sincere gratitude and best wishes to those who have devoted themselves to the front line of the fight against the epidemic and engaged in related dangerous positions in the severe environment. Sino-Ocean Group has established the “Special Fund for the Fight against the COVID-19 pneumonia pandemic” through Beijing Sino-Ocean Charity Foundation in an instant, which provided strong support to the front line for the potential secondary disasters through providing financial support and material support for the fights and prevention at the front line of epidemic areas in Wuhan and other places in Hubei, and provided assistance in the later stages of the epidemic by continuous following up and caring the trapped groups. We hope that the epidemic will pass as soon as possible and the people’s lives will be restored to be good and healthy.

剛剛過去的 2019 年，是具有轉折意義的一年。中華人民共和國迎來 70 周年華誕，我們進入了一個新的時代。全球經濟貿易增速顯著放緩，主要發達經濟體增速持續下行，中國在全球的經濟地位和經濟規模都達到了新高度，也面臨着經濟結構調整、經濟增速下行的新變局。經濟持續中低速發展；房地產業高位持續、增速趨緩、存量加大、盈利降低、行業集中、競爭加劇。這是發展的必然趨勢，將會在相當長的時期持續下去，成為新常態。

這一年是遠洋第四步發展戰略總結收官和第五步發展戰略研究啓動的關鍵之年。在這一關鍵時期，集團本着“精耕細作、強身健體”的年度主題，遵循“高質量、可持續”的發展理念，建立了符合集團發展需求的新經營管理體系，提高了決策效率，實現了對內賦能和提升項目核心競爭力的雙重要求。

這一年，集團投資標準提高，有息負債降低，低效資產處置，資產結構優化；建築健康、客戶意識、風險處置、廉潔自律、管理效率等各方面得到了加強。

這一年，我們歷練了一支客觀認識經濟規律、行業趨勢、企業現狀，具有勤儉務實精神和堅定執行力的團隊；我們展現出了克服萬難的生存能力、適應新環境的決心勇氣、做出轉變並贏得未來的堅定信心。

健康是人類永恒的主題，也是社會進步的重要標誌，新冠疫情的突發和肆虐，使得人們更加意識到“健康”的可貴。遠洋集團於 2016 年確定了品牌新理念：“建築·健康”。隨着“健康中國 2030”戰略的提出與美好生活時代的到來，遠洋集團仍將堅定踐行“建築·健康”這一品牌理念，將“健康”內化為遠洋的產品基因，身體力行實踐健康建築標準，堅守匠心品質，不斷提升健康人居體驗，為滿足人民對美好生活嚮往的追求而努力。

2020 年，是遠洋集團第五步發展戰略的第一年，是追求高質量、可持續發展的元年。遠洋集團將以終為始，遵循第五步發展戰略的願景和目標；聚焦·賦能，強化協同，發展主業。與此同時，集團未來也將加速創新，以更開放的心態，與更多以人為本、關注健康的夥伴一起，以改善人居質量為己任，用擔當築就健康建築。

The year 2019 that just passed was a turning point year. This year marked the 70th anniversary of the founding of the People’s Republic of China and we entered a new era. The global economic and trade growth slowed down significantly, the growth of major developed economies continued to decline, and China also faced new situations of economic structural adjustment and economic growth slowdown as its global economic status and economic scale reached new heights. The economy maintained development at a low and medium speed. The real estate industry maintained at a high level, and its growth slowed down, which had resulted in increasing stock, reduced profits, industrial concentration and intensifying competition. This is an inevitable trend of development and will continue for quite a long time to become a new normal.

This year was a pivotal year for Sino-Ocean in which it completed the fourth phase of strategic development and started the research of its fifth phase of strategic development. At this critical stage, with adhering to the theme for this year of “Crafting meticulously • Getting strong and fit” and following the “high-quality and sustainable” development concept, the Group established a new operation and management system that met the development needs of the Group, which had effectively improved the decision-making efficiency and achieved the double requirements of driving internal empowerment and boosting core project competitiveness.

During the year, with increased investment standards, decreased interest-bearing liabilities, disposal of inefficient asset and optimization of asset structure, the Group strengthened various aspects such as building health, customer awareness, risk disposal, integrity and self-discipline, and management efficiency.

We have trained a team with an objective understanding of economic laws, industry trends, the status quo of the enterprise, and with a diligent and pragmatic essence and a firm execution in the year. We have demonstrated our viability to overcome the difficulties, determination and courage to adapt to the new environment, and strong confidence in changing and winning the future.

Health is an eternal topic for human beings, and an important sign of social progress. As the outbreak of COVID-19 pneumonia pandemic, people have become more aware of the value of “health”. Sino-Ocean Group established a new brand concept of “Building • Health” in 2016. With the introduction of “Health China 2030” strategy and the arrival of the era of good lives, Sino-Ocean Group will adhere to its brand concept of “Building • Health” and incorporate “Health” into its product DNA to constantly implement healthy building standards and insist on artisan quality, continuously enhance healthy residence experience, and strive for satisfying people’s pursuit for good lives.

2020 is the year for the commencement of the fifth phase of strategic development of Sino-Ocean Group, and the year of pursuing high-quality and sustainable development. Sino-Ocean Group will begin with the end in mind and follow the vision and targets of the fifth phase of strategic development to strengthen synergy and develop the principal business through Focusing • Empowerment. In addition, the Group will also accelerate innovation and work with more people-oriented and health-centered partners with an open mind to fulfill the responsibility of improving human residential quality and achieve healthy building with commitment.

遠洋健康，專業引導疫情防控

HEALTHY SINO-OCEAN, GUIDING THE EPIDEMIC PREVENTION AND CONTROL IN A PROFESSIONAL WAY

隨着春節長假結束，企業紛紛面臨復工，該時間段也正是疫情防控的關鍵階段。同時，考慮我國大部份地區還處於供暖期，公共建築如何安全使用空調（供暖）系統，對於新冠肺炎疫情的控制具有重要意義。遠洋集團積極響應國家“疫情就是命令，防控就是責任”的號召，要實現疫情防控和企業發展協調同步“兩不誤”，在確保員工客戶健康安全同時做好經營管理工作。集團疫情防控協調工作小組火速組織遠洋設計院、商業地產事業部和寫字樓事業部相關專業負責人，開展了針對集中空調和新風系統疫情防控工作專題研究。

With the end of the New Year holiday, enterprises are facing resumption of work, and this period of time is also a critical stage for epidemic prevention and control. Meanwhile, considering that most places in the country is still in the heating period, how to safely use air conditioning (heating) systems in public buildings is of great significance for the control of the COVID-19 pneumonia pandemic. Sino-Ocean Group actively responded to the country's call for "Outbreaks of epidemic are orders, Prevention and control is responsibility". To achieve the coordination of anti-epidemic and enterprise development, it must ensure the health and safety of employees and customers while resuming its operations and management. The Group's coordination group for epidemic prevention and control quickly organized relevant heads of Sino-Ocean Design Institute, commercial real estate division and office premises division to conduct a special study on epidemic prevention and control of centralized air conditioning and fresh air systems.

Over 25 years, Sino-Ocean has been committed to improving people's living environment by enhancing product quality and constantly exploring, excavating and improving the health performance of buildings, incorporating health elements into what we have done. As a real estate company, the way we seek will naturally be using architecture to care for the health of users, and the "building health" has come into being accordingly. From green building to healthy building, both are the results of Sino-Ocean's R&D and practice for years, and healthy buildings have made us concern more about the element of "people" itself in the building.

GREEN BUILDINGS VS. HEALTHY BUILDINGS

關聯點 CONNECTIONS

- 01 綠色建築 GREEN BUILDINGS 能源危機 Energy Crisis
- 健康建築 HEALTHY BUILDINGS 生存、生活環境惡化 Deterioration of living and living environment

綠色建築起步在先，健康建築起步在後。綠色建築背景為能源危機，健康建築背景為生存、生活環境惡化。可以說是，健康建築是對於建築性能的新要求和新需求。

Green buildings were introduced before healthy buildings. The former were developed to tackle energy crises, whereas the latter was postulated against a backdrop of deterioration in people's living environments. In other words, healthy buildings reflect the latest requirements and demands of building performance.

- 02 綠色建築 GREEN BUILDINGS 側重於環境 Focus on the environment
- 健康建築 HEALTHY BUILDINGS 側重於人 Focus on people

兩者都是在利用建築設計、技術等進行建築和其周邊環境的提升，達到最終目標——綠色建築，側重於環境；健康建築，側重於人。

Both are developed to improve the buildings and their surrounding environments through architectural design and technology application etc., and to achieve the ultimate goal of green buildings for the environment and healthy buildings for people.

- 03 綠色建築 GREEN BUILDINGS 能耗、水耗、資源消耗等 Energy consumption, water consumption, resource consumption, etc.

健康建築 HEALTHY BUILDINGS 空氣品質、聲環境、光環境等 Air quality, sound environment, light environment, etc.

綠色建築在應用技術方面，側重於能耗、水耗、資源消耗等；健康建築在應用技術方面，側重於空氣品質、聲環境、光環境等。

In terms of applied technology, green buildings focus on energy consumption, water consumption, and resource consumption where healthy buildings focus on air quality, acoustic environment, and light environment.

- 04 兩者的重疊點較為集中在新風要求、熱環境營造。 Overlaps between the two mostly concern fresh air and thermal environment requirements.

- 05 兩者間存在互為補充關係，從而整合建構環境友好和使用者友好型建築。 The two are complementary, with the common objective of creating environmental-friendly and user-friendly buildings.

截至 2019 年 12 月 31 日，完成 WELL 健康建築達 111.38 萬 m²，距離目標需要在 1 年內完成 138.62 萬 m² 的項目註冊任務。因住宅建築面積相比公建類項目小，則在住宅類項目推廣的同時，將側重於公建類項目，潛在項目為邦邦寫字樓。WELL 健康建築標準⁵ 是遠洋打造健康建築的最重要工具。

As of 31 December 2019, we have constructed 1.1138 million m² of WELL-standard healthy buildings, and another 1.3862 million m² of healthy buildings need to be registered within the next year to meet our target. As residential properties are smaller relative to public construction projects, we will prioritize public buildings in residential project marketing activities. One of the potential projects is the "Bangbang Office Building". The WELL Healthy Building Standards⁵ are the most important tool for healthy building development at Sino-Ocean.

• 案例CASE

遠洋集團以“健康”重塑辦公新體驗 SINO-OCEAN GROUP RESHAPES NEW OFFICE EXPERIENCE WITH THE CONCEPT OF "HEALTH"

2011年，遠洋集團在北京CBD核心區獲取Z13項目。該項目已於2019年5月28日正式交付啓用。遠洋集團倡導的“建築健康”理念，在這座明星大廈中得到了完美體現。

譬如：雙層內呼吸式幕牆。採用了雙層內呼吸式幕牆體系，東西立面每隔3m就設置一個穿孔板可開啓扇，可以直接引入自然風，同時設有排風系統，實現真正呼吸，減少輻射熱，每年可節能約10%；雙變風量VAV空調系統。系統實現供冷、供熱單獨分區控制，有效滿足不同運行區域的冷熱調節需要，滿足客戶對空調系統不同溫度的需求。室內空氣品質綜合解決方案，提升系統的淨化效果；以及採用了環保的真空垃圾系統，利用空氣取代人力作為傳輸動力，以全程密閉的方式將辦公垃圾從各樓層自動輸送到垃圾收集站內等。

也正因融匯了大量健康元素和設計，項目成爲CBD區域首屈一指的健康辦公樓宇。

In 2011, Sino-Ocean Group successively acquired Z13 project in the core area of Beijing CBD. The project was officially delivered and put into use on May 28, 2019. Its concept of "Healthy Building" is perfectly embodied in this brilliant building.

For example: double-layer inner breathing curtain wall, which adopted a double-layer inner breathing curtain wall system, in which perforated plates were installed on the east and west facades at distance of every 3m to open the fan, which can directly inhale natural wind. At the same time, it has an air exhausting system to achieve true breathing and reduce radiant heat, thus saving 10% of energy consumption every year; dual variable air volume (VAV) air conditioning system, which achieves separate control of cooling and heating, and effectively meets the needs of cooling and heating in different operating areas, and meets the customer's needs for different temperatures of the air conditioning system. Integrated solutions for indoor air quality, which can improve the purification effect of the system; and adopted environmentally-friendly vacuum waste system, which uses air instead of manpower as the transmission power, and automatically transports office waste from each floor to the garbage collection station in a fully enclosed manner.

Due to the integration of many health elements and designs, the project has become the premier healthy office building in the CBD area.

Calculation of Total Score and Rating Standards for Supplier Evaluation

我們在《採購管理規範》和各項管理程序下進行規範化的誠信合作。集團制定公平公正的範本合同，要求各分中心嚴格執行且誠信履行合同，同時匹配開展對員工以及供應商有關誠信經營、公平競爭政策的培訓。

2018年，遠洋為了更明確貫徹責任理念，帶動供應商共同踐行，我們有針對性的補充了要求供應商共同履行社會責任的《供應商行為守則》，並修訂了《遠洋集團供應商入庫標準》；明確供應商考察團隊職責與團隊績效相關；在資信初審階段，要求供應商簽署《廉潔自律承諾書》、《供應商關聯性說明》、《供應商行為守則》並共同遵守。集團所有供應商均承諾遵守上述相關社會責任行為準則。供應商責任培訓績效達 100%。

2019年，發布新版《遠洋集團供應商管理辦法》，內容涵蓋供應商分類、入庫考察、供應商評估等相關內容，《供應商總評估分計算及等級評定標準》，詳細闡述了供應商評估分值計算邏輯。

We enforce the "Code of Conduct for Procurement Management" and other management procedures to ensure effective regulation of and good faith in collaborations with partners. The Group has formulated fair and impartial sample contracts, and all subcenters are required to strictly implement and fulfill the contracts in good faith. Trainings on business integrity and fair competition policies are provided to employees and suppliers.

In 2018, for reinforcing accountability policies among suppliers, we developed the "Code of Conduct for Suppliers" that requires our suppliers to fulfil their social responsibilities and amended the "Criteria for Entry into Suppliers List of Sino-Ocean Group"; clarified the correlation between responsibilities and work performance of suppliers' review teams; requested suppliers to enter into a "Statement of Undertaking on Anti-Corruption and Self-Discipline", "Statement on Affiliation between Suppliers" and "Code of Conduct for Suppliers" during initial credit review for their joint compliance. All of our suppliers have committed to observe the above-mentioned relevant codes of conduct on social responsibilities, and the ratio of training on responsibilities performance by suppliers was 100%.

In 2019, we released a new version of the "Administrative Measures for Suppliers of Sino-Ocean Group", which covers the contents of supplier classification, inspection on entry into supplier list, supplier evaluation, etc., and the "Calculation of Total Score and Rating Standards for Supplier Evaluation", which elaborates the score calculation logic of supplier evaluation.

集團從環境保護、支持當地經濟、降低成本等角度出發，鼓勵內部更多選用與項目距離較近供應商。由於項目遍佈全國，集團管控範圍內供應商遍佈全國（各省市分布情況詳見附錄 3）

Taking into account factors such as environmental protection, support to local economy and cost reduction, the Group encourages internal departments to choose suppliers near projects. Giving priority to local suppliers depending on project location, we conduct procurement operations exclusively through the online "Seagull II Tender Platform", following principles of "transparency, fairness, competitive pricing, confidentiality and recusal." Every single step can be retrieved and verified via the internet to ensure impartiality of procurement results. We have also developed proceduralized management mechanisms for regular exchanges with our partners, such as the "Contract Performance Assessment Criteria for Suppliers of Sino-Ocean Group (for Construction Engineering, Goods and Services)" in which it is expressly provided that strategic suppliers are subject to semi-annual reviews, and that "cooperation feedback forms" are collected from suppliers every two months to keep track of the partners' performance. In 2019, 2,946 suppliers were reviewed.

Sino-Ocean has always paid particular attention to the environmental and social performance of suppliers. For example, general construction contractors are required to provide environmental, quality and occupational health management system certifications. In 2019, 58 civil construction general contractors and 5 mechanical and electrical general contractors were introduced based on this criteria. Supplier qualification standards include quality and occupational health management certifications, and the general civil contractors and general mechanical and electrical contractors all held such certifications.

Our second book “Healthy Living,” published in 2017, gives a thorough account of healthy living based on detailed interpretations of “healthy homes,” “healthy life” and “healthy communities” from the perspective of harmonizing people, buildings, and the environment. Our third publication “Health Methodology” published in November 2018 shows people a panoramic of health methodology – that is, how principles of the Building Health are applied in real estate development projects. Similar to the healthy building approach, Sino-Ocean’s “health trilogy” – “Building Health,” “Healthy Living” and “Health Methodology” – introduces readers to healthy building theories step-by-step, and also serves as a reflection of how our understanding of healthy building has evolved over the years.

Guided by the brand philosophy of “Joint Growth, Building Health (共同成長，建築健康)” and after years’ exploration and accumulation, Sino-Ocean Group developed and updated a systematic, comprehensive, and applicable Sino-Ocean Healthy Building System 1.1 that integrates 3 international health standard studies, 21 health special research, 20 health display tool development in 30 categories, and more than 150 health databases and is more applicable to the physical and mental health of the Chinese people on the basis of application in nearly 70 landing projects with 14.01 million m², 3,986 sets of practical data and 122 innovative feedback since 2018 by using evidence-based practice, medical science and innovative methodologies as the three theoretical basis. In order to facilitate the spread of the “Health” concept and enhance customer experience, it valued customer contact and provide immersive experience for customer to enable them experience the “Healthy” lifestyle advocated by Sino-Ocean. 在各利益相關方的監督和專家同事的努力下，我們將持續進行系統升級，以更好地提升集團管理能力及環境表現。
We will continue to upgrade the system to further enhance the Group's environmental performance under the supervision of various stakeholders and through the hard work of our specialists.

綠色施工 GREEN CONSTRUCTION

我們高度重視環境保護、綠色健康理念，組織全員參加節能環保培訓，使環境理念根植員工心中。集團嚴格遵守國家關於環境的法律法規和相關標準規範，我們始終依據項目當地政策要求，在項目開工前嚴格履行項目環評審批程序，認真組織開展新項目的可行性評估和環境影響評價，並在當地環保部門批覆後據此進行開發安排，且在項目驗收、交付時，會進行《環境評估報告》實測，並在政府制定相關網站中進行公示，方便大眾監督。

房地產建造與開發造成負面的環境影響，也可能侵犯附近居民享受清潔環境的基本權利。因此，建造過程中，我們避免對水、空氣、土壤等環境造成生態影響。我們保障產品全周期在排放物、資源消耗以及生態影響等各方面均控制在相關法律法規要求範圍內，並在此基礎上竭力達到更高標準。

遠洋時刻關注排放問題，為固化相應工作流程，制定了集團內部制度標準，以保障產品全周期在排放物、資源消耗以及生態影響等各方面均控制在相關法律法規要求範圍內，並在此基礎上竭力達到更高標準。於 2019 年度內，本集團未發生重大違反環境法律法規事件。

為改善作業人員的工作環境，建立與開發環境的和諧關係，推進營造項目現場施工管理標準化，依據《中華人民共和國安全生產法》、《中華人民共和國環境保護法》、《中華人民共和國建築法》、《建築施工高處作業安全技術規範》、《遠洋營造安全文明施工視覺識別手冊》等相關規定要求，2018 年遠洋完成編製《遠洋集團營造項目現場文明施工管理標準》並於 2019 年進行落地執行。

We attach great importance to environmental protection and the philosophy of "green health" continuously reinforcing environmental education among our employees through staff training on energy conservation and environmental protection. We observed the Environmental Impact Assessment (EIA) procedures for construction projects, conducted effective feasibility evaluation and EIA on new projects, and made development and investment decisions in strict compliance with national laws, regulations and standards on environmental protection. We started our development upon approval by local environment authorities and published the EIA results on governments' relevant websites for public monitoring.

Real estate construction and development will cause negative environmental impacts, and may also violate the fundamental rights of nearby residents to enjoy a clean environment. Therefore, during the construction process, we avoided ecological impacts on the environment such as water, air and soil. We guaranteed that the product lifecycle are controlled within the scope as required by the relevant laws and regulations in terms of the emissions, resource consumption and ecological impact, and thereby striving to achieve higher standards.

Sino-Ocean is concerned about emission issues all the time. Internal policies and standards related to emissions, resource consumption and ecological impact were introduced to routinize processes and ensure compliance with laws and regulations throughout product development cycles. Wherever possible, we made every effort to further improve the standards of our operations and products. The Group had no major violations of environmental laws and regulations in 2019.

In order to improve operating staffs working environment, create a harmonious relationship with the environment under development, and further standardize the on-site construction management of construction projects, Sino-Ocean completed the preparation of "Standards for Civilized On-site Construction Management of Construction Projects of Sino-Ocean Group" in 2018 according to the "Production Safety Law of the PRC", the "Environmental Protection Law of the PRC", the "Construction Law of the PRC", the "Technical Specifications for Construction Work Safety At Height", and Sino-Ocean's "Visual Identification Manual on Safe & Civilized Construction of Construction Projects", among other relevant requirements, which was implemented 2019.

綠色健康運營

GREEN HEALTHY OPERATIONS

集團多元業務和職能單位在集團節能減排綠色運營的要求下，以其各自專業所長，踐行並不斷提升綠色運營能力，全方面協同保障遠洋的生態環境友好表現。

遠洋集團在地產項目建設過程中，十分注重減少對於環境增加的負擔，倡導施工材料盡量做到重覆使用，由施工安排回收、金屬、木質廢棄物均由專業回收單位進行回收，混凝土破碎後運至其他項目臨時道路路基使用。

Leveraging their respective strengths, our business and functional units have consistently practiced the healthy building philosophy and improved green operations capacity, in line with the Group's call for saving energy and reducing emissions in business operations. Concerted efforts were made to guarantee the Group's high eco-friendly performance.

During real estate project development, Sino-Ocean prioritizes minimizing negative impacts on the environment through building material recycling. Metal and wood waste are recycled by professional service providers, and used concrete is used to build temporary roads at new construction sites.

● 避免土地閒置 MINIMIZING IDLE LAND

集團重視國家對於“避免土地閒置”的要求，在2018年正式發布《遠洋集團關於落實開發業務快周轉工作的通知》及《遠洋集團快周轉項目示範區標準化》等相應一系列策略指引文件，要求加快開工等工作進度。各相關部門持續跟蹤相關通知、標準等文件落實情況，及時作出相應補充及修訂，切實有效避免土地閒置可能性。

2019年，集團發布《遠洋集團開發業務快周轉實施指引》再次明確快周轉要求和具體實施策略，發布《遠洋集團產品標準化管理辦法》促進快周轉實現。

In 2018, the Group formally issued a serial of strategic guidance documents, such as the “Notice from Sino-Ocean Group on Implementing Accelerated Turnover for Development Projects” and “Standardization of Demonstration Areas in Accelerated Turnover Projects of Sino-Ocean Group”, to comply with the national requirement of “minimizing idle land” and accelerate construction progress. Besides continuously following up on implementation of such notices and standards, all relevant departments made supplements and revision in a timely manner, so as to minimize the possibility of idle land practically and effectively.

In 2019, the Group issued the “Guidelines for the Implementation of the Fast Turnover of Development Business of Sino-Ocean Group”, which clarifies again the requirements for fast turnover and specific implementation strategies, and issued the “Administrative Measures for the Products Standardization of Sino-Ocean Group”, aims to promote the realization of fast turnover.

遠洋東方境世界觀（武漢）計劃實施“海綿城市”設計 SPONGE CITY DESIGN ADOPTED IN ORIENTAL WORLD VIEW (WUHAN)

海綿城市是推動綠色建築建設，低碳城市發展，智慧城市形成的創新表現，是新時代特色背景下現代綠色新技術與社會、環境、人文等多種因素下的有機結合。國家大力推行海綿城市建設之時，武漢成爲重要試點城市之一。遠洋東方境世界觀（武漢）項目積極響應武漢市政府號召，將海綿城市建設理念運用到住宅建設當中，以生態優先、因地制宜及經濟可行性規劃原則，根據項目建設的實際情況進行海綿城市理念的應用與推廣，有效整合住區內部水資源，完善生態環境，提升住區內部的景觀質量，實現人與自然環境和諧共處的重要理念。2019年，項目的1A、2、3、8號四個住宅地塊已通過海綿城市方案報審，並獲取批覆。

Sponge city is an innovative platform that promotes the construction of green buildings, the development of low-carbon cities, and the development of smart cities which integrates modern green technologies and social, environmental, and human factors. In the context of the characteristics of the new era, the PRC vigorously promoted the construction of sponge cities, and Wuhan was selected as one of the key pilot cities. We actively responded to the call of the Wuhan Municipal Government and in the Oriental World View (Wuhan), we applied the concept of sponge city in residential construction. Based on the planning principles of ecological priority, adapting to local conditions and economically feasibility, the sponge city concept was promoted and applied in the project according to its actual situation, where we effectively integrated water resources within the residential area, improved the ecological environment, improved the quality of the landscape inside the residential area, and realized the harmonious coexistence of people and the natural environment. In 2019, the sponge city scheme for four residential plots Nos. 1A, 2, 3, and 8 of Oriental World View (Wuhan) has reviewed and approved.

設計依據 DESIGN BASIS

《國務院辦公廳關於推進海綿城市建設的指導意見》（國辦發[2015]75號）、《海綿城市建設技術指南——低影響開發雨水系統構建（試行）》（2014年）、《武漢市海綿城市規劃技術導則（試行）》（2019年）及其他相關文件。

"Guiding Opinions of the General Office of the State Council on Promoting the Construction of Sponge City" (Guobanfa [2015] No. 75), "Technical Guidelines for Sponge City Construction-Low Impact Development Rainwater System Construction (Trial)" (2014), Wuhan Technical Guidelines for Sponge City Construction (Trial) (2019)" and other related documents.

規劃原則 PLANNING PRINCIPLES

首先是生態優先：優先利用自然排水系統與低影響開發設施，實現雨水的自然積存、自然滲透、自然淨化和可持續水循環，提高水生生態系統的自然修復能力，盡量保證地塊開發前後的水文狀態不變。

其次要做到因地制宜：在尊重地塊原有城市屬性功能前提下，利用生態的理念進行地塊的海綿城市設計，使海綿城市建設與地塊建設方案緊密結合。

再次要考慮經濟可行：在滿足功效的前提下，選擇經濟的技術措施，降低建設成本。

Firstly, ecological priority: natural drainage systems and low-impact development facilities shall be given priority to achieve the natural accumulation of rainwater, natural infiltration, natural purification and sustainable water cycling, thus improving the natural restoration capacity of the water ecosystem, and ensuring the hydrological status before and after the development of the plot keep unchanged.

Secondly, adapting to the local conditions: on the premise of respecting the original urban attributes and functions of the plot, the ecological concept shall be adopted to design the sponge city of the plot, so that the sponge city construction and the plot construction plan are closely integrated.

Thirdly, economic feasibility: in addition to meet the functional utility, economic technical measures shall be taken to reduce construction costs.

項目利用樓棟周邊分散設置下沉綠地和部份中心景觀區設置雨水花園，保證雨水可以匯入下沉綠地，滿足蓄水需求。利用小區集中綠化，設置多處集中海綿設施，通過下沉綠地和雨水花園實現雨水消納和面源污染削減，減少雨季小市政排水壓力，改善社區居住環境，使整體小環境更加健康、舒適。

The project uses green lands scattered around the building to set up sunken green lands and uses part of central landscape areas to set up rain gardens to ensure that rainwater can sink into the submerged green lands to meet water storage needs. The centralized greening of the community shall be utilized to set up multiple centralized sponge facilities, with aims to realize rainwater absorption and reduction of non-point source pollution through sunken green lands and rain gardens, improve the living environment of the community, and make the overall environment more healthy and comfortable.

● 生態恢復與治理

ECOLOGICAL RESTORATION AND TREATMENT

三亞大茅河道清理

SANYA DAMAO RIVER COURSE CLEARING WORK

2019 年已完成河道治理

Watercourse treatment work completed in 2019

為籌備首屆中非農業合作論壇，選取大茅遠洋生態村作為河道治理示範點，治理工程包括：滾水壩上游約 300 米範圍內的河道疏浚工程、邊坡擴挖工程、河底及坡腳拋石工程、彎道段右岸邊坡護砌工程（約 50 米）及工程區河道管理範圍內生態修整及林地改造工程。2019 年已完成建設 800 米濱河步道、一處 1,500m² 濱河休閒平台。

大茅河的治理，以“原生態河道為主，人工景觀措施為輔”的治理理念，“不砍樹、不裁彎，保持原生態”的手法，在完善防洪、排澇、灌溉、截污等功能系統的同時，有效保護河道內生態的多樣性及防止水土流失，構建良好循環功能的水生態系統。讓大茅河由過去以防洪安全為核心的傳統河道向適應鄉村振興大局，集防洪灌溉、富民美村多功能於一體的水利風景、生態屏障轉變。

In order to prepare for the first China-Africa Agricultural Cooperation Forum, Damao Sino-Ocean Eco-village was selected as a demonstration site for watercourse treatment. The treatment projects include: river dredging works within approximately 300 meters upstream of the rolling dam, slope expansion engineering, river bottom and slope foot riprap project, right bank slope protection project (about 50 meters) in the bend section, and ecological restoration and forest land reconstruction projects within the watercourse management area of the project area. In 2019, the 800-meter riverfront walkway and a 1,500 m² riverside leisure platform have been completed.

The treatment of Damao River is based on the management philosophy of "keeping original ecological river course, supplemented by artificial landscape", and "not cutting trees, not cutting bends, maintaining the original ecology". In addition to improving functional system such as flood prevention, drainage, irrigation, and interception, it can effectively protect the ecological diversity in the river course and prevent water and soil loss, and build a water ecosystem with good recycling functions. The Damao River was transformed from the traditional river channel that used flood prevention and safety as the core function to water conservancy landscapes and ecological barriers which adapts to the overall situation of rural rejuvenation and integrates multiple functions such as flood control irrigation, enriching and beautifying village.

● 生物多樣性保護

BIODIVERSITY CONSERVATION

遠洋十分關注生物多樣性保護。三亞大茅村背靠海南甘什嶺省級自然保護區，坐擁 1200 畝的三農水庫，蜿蜒 12 公里的大茅河，具備水系、灘塗、平原、山地、雨林等多樣化的自然生態景觀。

遠洋將 1,728 m² 的溫室改造成為集熱帶特色植物觀賞、標本展覽、昆蟲飼養觀察、環境教育於一體的自然生態館，免費向公眾開放。

同時，遠洋充份利用大茅村的自然生態資源，堅持不破壞生態環境，不興建大型裝置，專注自然教育和環境保育的推廣。2019 年遠洋發起全國首屆自然博物主題設計競賽，吸納來自倫敦藝術學院、東京大學等國內外各界社會力量關注大茅村，深入挖掘在地的自然文化，收獲 106 份自然博物課程和裝置設計作品。未來，遠洋將給大茅村打造為“中國自然博物研學第一村”，成為國內外遊客接受自然體驗、環境教育的目的地。

Sino-Ocean focuses on biodiversity conservation. Sanya Damao Village is situated in Ganshiling Nature Reserve, and embraces a 1,200 mus of Sannong Reservoir and a 12-kilometer Damao River. It boasts of a variety of natural ecological landscapes such as water systems, mud flat, plains, mountains and rain forests.

Sino-Ocean has transformed the 1,728 m² greenhouse into a natural ecological pavilion integrated with tropical plant viewing, specimen exhibition, insect breeding observation, and environmental education, which is open to the public for free.

In addition, Sino-Ocean makes full use of the natural ecological resources of Damao Village, insists on not damaging the ecological environment, does not build large installations, and focuses on the promotion of natural education and environmental conservation. In 2019, Sino-Ocean launched the first natural museum theme design competition, which attracted people from various circles at home and abroad, such as the London School of the Arts and the University of Tokyo, to pay attention to Damao Village. By deeply exploring the local natural culture, 106 natural museum courses and installation design works were collected. In the future, Sino-Ocean will develop Damao Village into the "No. 1 Village of Natural Science Research in China" and become a destination for domestic and foreign tourists to receive natural experiences and environmental education.

While improving the working environment of employees, the Group also pays attention to the physical health of employees. In order to improve the quality of employees' health, in the newly renovated Sino-Ocean Headquarters office area, a "TCM Physiotherapy Room" is set up, and physiotherapy equipment is provided. Physical therapists are invited to provide massage therapies for employees to help them relax and improve their satisfaction. 助力社區發展

SHARING BENEFITS WITH COMMUNITIES

遠洋支持當地社區建設，助力鄉村發展，支持鄉村振興。在四區規劃定位下，遠洋集團以產業導入和生態保護為支點，從生態、生產、生活三個方面，融合美麗鄉村、田園綜合體的發展思路，努力將大茅區域打造成為產業興旺、生態宜居、鄉風文明、治理有效、生活富裕的樣板項目。

Sino-Ocean Group provides supports in the local community development, rural development and rural revitalization. Guiding by the Four-areas planning, Sino-Ocean Group takes industrial introduction and ecological protection as the fulcrum. From the three aspects of ecology, production and life, Sino-Ocean Group integrates the concept of beautiful village and countryside garden into its development, and strives to develop the Damao area into a model project with thriving industry and livable ecology, civilized custom, effective governance and wealthy life.

● 支持鄉村振興 SUPPORTING RURAL REVITALIZATION

隨着黨的十九大提出實施“鄉村振興戰略”，中國農業現代化的發展正在進入大發展的時期，遠洋集團着眼於國家“鄉村振興戰略”、企業“產業協同主業戰略”，願意發揮自身在項目建設、資本運作、成果轉化、市場運營等方面的機制優勢，與科研單位和相關企業一道，發揮各自優勢，相互支持，攜手共進，盡快形成現代農業的產業化和商業化，最終實現農業科研成果向市場的轉化。

2019年7月，遠洋集團與中國農科院戰略攜手，以參與建設“國際設施園藝產業孵化中心”為起點，未來就農業現代化、農業技術成果轉化、國家農業重點實驗室以及農業高峰論壇等方面展開緊密合作，共同推動中國農業振興和發展。該中心的功能設施包括：中國農科院綜合展廳、各研究所科研成果展示、國際創新技術展示、產業孵化中心、以及農業高峰論壇等。以此為示範項目，結合北京市、海澱區以及中關村發展定位，立足首都、整合國際、輻射全國，打造中國農業技術的旗艦樣板。

With the "Rural Revitalization Strategy" proposed at the 19th National Congress of the Communist Party of China, the development of China's agricultural modernization is entering a period of great development. Sino-Ocean Group is focusing on the country's "Rural Revitalization Strategy" and the Company's "Industrial and Principal Business Coordination Strategy" and leveraging its strengths in project construction, capital operation, achievement transformation and market operation, Sino-Ocean Group worked with scientific research units and relevant enterprises to exert their respective advantages and support each other to realize the industrialization and commercialization of modern agriculture as early as possible, and finally put agricultural research result into market.

In July 2019, strategic cooperation entered into between Sino-Ocean Group and the Chinese Academy of Agricultural Sciences, starting with engaging in the construction of the "International Facility Horticulture Industry Incubation Center". In the future, they will carry out close cooperation in agricultural modernization, transformation of agricultural technological achievements, national key laboratories and agricultural summit forums to jointly promote the revitalization and development of China's agriculture. The center's functional facilities include: the comprehensive exhibition hall of the Chinese Academy of Agricultural Sciences, scientific research results display of various research institutes, international innovation technology display, industrial incubation center, and agricultural summit forum. Taking this as a demonstration project, aligning with the development positioning of Beijing, Haidian District and Zhongguancun, by being rooted in the capital, integrating the international resource, and expanding to national coverage, we will create the flagship model of Chinese agricultural technology.

11月，遠洋集團作為積極參與、支持農業現代化建設的企業代表受邀出席2019中關村論壇。遠洋集團董事局主席、總裁李明在論壇中表示，農業發展不僅與農民和農村有關，還與城市化進程、社會進步、國家富強緊密相關。遠洋集團在投資開發、項目建設、資本運作、成果轉化、市場運營等方面積累了豐富資源和經驗，未來遠洋願與包括農科院、中環易達等在內的科研機構、產業各方進一步加強交流與合作，探索農業產業融合的新思路，為提升農業產業化發展的效率和價值做出貢獻。加快“鄉村振興”進程，服務於國家戰略。

In November, as a corporate representative actively participating in and supporting agricultural modernization, Sino-Ocean Group was invited to attend the 2019 ZGC Forum. In the forum, Li Ming, Chairman of the Board and CEO of Sino-Ocean Group, stated that agricultural development is not only related to farmers and rural areas, but also closely related to urbanization, social progress, and prosperity of the country. Sino-Ocean Group has accumulated abundant resources and extensive experience in investment development, project construction, capital operation, achievement transformation and market operation. In the future, Sino-Ocean Group is ready to further strengthen exchanges and cooperation with scientific research institutions and industry parties including the Academy of Agricultural Sciences and AgriGarden, explore new ideas for the integration of agricultural industry, and make its contribution to improve the efficiency and value of agricultural industrialization. To serve the national strategy, Sino-Ocean Group will support to accelerate the process of "Rural Revitalization".

● 鄉村扶貧賦能 RURAL POVERTY ALLEVIATION

為了更好的參與國家深度扶貧、脫貧攻堅戰，2019年全年，北京遠洋之帆公益基金會在扶貧專項（包括助學教育）資金達426萬人民幣，惠及中國10多個地區約20萬人次。特別是首屆“一帶一路”國際合作高峰論壇舉辦以來，遠洋之帆累計投入助學教育領域和發展援助超過1,000萬元，受益總人數超過6萬人次。

遵照中國在2018年發布的鄉村振興國家戰略，遠洋從產業興旺、生態宜居、鄉風文明、治理有效、生活富裕五個方面開展對三亞市大茅村的鄉村建設。

In order to better participate in the country's campaign of extreme poverty alleviation and poverty eradication, in 2019, Beijing Sino-Ocean Charity Foundation invested RMB4.26 million in poverty alleviation (including education aid), benefiting approximately 200,000 people in more than 10 regions across China. In particular, since the inauguration of the first "Belt and Road" International Cooperation Summit Forum, Sino-Ocean Charity Foundation has invested a total of more than RMB10 million in education aid and development assistance, benefiting more than 60,000 people in total.

In line with China's National Strategy for Rural Rejuvenation released in 2018, Sino-Ocean conducted rural construction of Damao Village in Sanya from five aspects: industrial prosperity, ecological livability, rural civilization, effective governance and affluent life.

大茅村是一個以傳統農業為主的村子，立足農業產業發展，遠洋以發展“熱帶特色高效農業”為基底，通過現代農業技術推廣和特色農產品規模化普及，為中高端市場提供安全、生態、健康的精品農產品，培育在地農產品品牌。

與此同時，探索“農業+教育”“農業+旅遊”“農業+文化”等多產業融合發展模式，是遠洋在推動大茅村可持續發展的另一實踐。遠洋集團基於自身在投資開發、項目建設、資本運作、成果轉化、市場運營等方面積累的豐富資源和經驗，在大茅遠洋生態村項目的建設過程中，積極參與破解民生、土地、產業、資金等難題，與村委會一起實現組織治理良好發展，促進產業融合、生態文明建設。2018年大茅村村民人均收入提升到13,568元，較2017年提高57%，土地價值提高18倍。2019年12月10日，大茅遠洋生態村被指定為首屆三亞中非農業合作論壇的唯一參觀地，成為向世界展示中國農村農業發展水平的窗口。

Damao Village is a traditional agriculture-based village. Rooted in the development of the agricultural industry, Sino-Ocean has developed the "tropical and highly efficient agriculture" as the basis. Through promotion of modern agricultural technology and the extensive spread of featured agricultural products, Sino-Ocean provides safe, ecological, and healthy fine agricultural products for high- and medium-end market, and fosters local agricultural product brands.

Further, exploring the multi-industrial integration development model of "agriculture + education", "agriculture + tourism" and "agriculture + culture" is another practice of Sino-Ocean to promote the sustainable development of Damao Village. Leveraging on its abundant resources and extensive experience accumulated in investment and development, project construction, capital operation, achievement transformation and market operation, Sino-Ocean Group was actively involved in addressing people's livelihood, land, industry and funds issues in the construction process of the Damao Sino-Ocean Eco Village project. Joint efforts were made with the village committee to achieve a good development of organizational governance, promote industrial integration and the construction of ecological civilization. In 2018, the per capita income of villagers in Damao Village increased to RMB13,568, representing a 57% increase over 2017, and the land value increased 18 times. On December 10, 2019, Damao Sino-Ocean Eco Village was designated as the only visiting place for the First Sanya China-Africa Agricultural Cooperation Forum and became a window to show the world's rural agricultural development level to the world.

產業扶貧是手段，人才賦能是根本。大茅村首期建設項目——大茅共享農莊向在地村民提供固定崗位 52 個和兼職崗位 30 餘個，就業村民平均年齡 41 歲。前不久榮獲“大茅村 2019 年度優秀員工”稱號的村民吉麗霞是大茅村一名“80 後”農民，2017 年，聽說遠洋集團投建的高科農業溫室正在招工，可就近上班，每天八個小時工作制，立刻前來應聘。雖然順利簽約入職，但剛進溫室作業，面對數據繁多的機器設備和標準細緻的操作要求，吉麗霞感覺很是“費腦”。經過農業技術員的培訓，在兩個月的實踐和學習中，她逐漸可以獨立擔任從種植到採摘的全流程作業。現在，除了對自己工作精益求精外，還經常指導新來的工友，甚至能夠主動發現問題及時反饋給技術團隊，從農民到產業工人——這名“80 後”農村婦女實現了真正的轉型，“奮鬥的過程雖然艱苦，但是結果是甜美的、幸福的”，吉麗霞用實際行動詮釋了奮鬥的意義。

Industrial development is a means to alleviate poverty, and fundamental solution is talent empowerment. The first phase of Damao Village construction project, Damao Sharing Farm, offered 52 fixed positions and over 30 part-time positions to local villagers with the average age of employed villagers of 41 years. Ji Lixia, a villager who won the title of "Daomao Village Outstanding Employee of the Year 2019" is a "1980s generation" farmer in Damao Village. In 2017, when she knew about that the Hi-Tech Agricultural Greenhouse invested by Sino-Ocean Group was recruiting workers and could work nearby at eight hours a day, she came to apply for a job at once. Although she successfully entered into a working contract, when she just entered the greenhouse, and faced with equipment with a ton of data and standardized and detailed operating requirements, Ji Lixia felt very "tough". After receiving training from an agricultural technician, in two months of practice and learning, she could gradually take on the whole process from planting to picking. Now, in addition to improving her work, she often guides new workers, and can even actively discover problems and feed them back to the technical team in a timely manner. From farmers to industrial workers, this "1980s generation" rural woman has realized a real transformation, "Although the process of struggle is arduous, the result is sweet and happy". Ji Lixia explained the meaning of struggle with actual actions.

● 積極支持當地生態建設

PROACTIVELY SUPPORTING LOCAL ECOLOGICAL CONSTRUCTION

黨的十八大以來，國家把生態文明建設納入中國特色社會主義事業的總體佈局，使生態文明建設成爲“五位一體”總體佈局中不可或缺的部份，進一步表明了生態文明建設的重要戰略地位。遠洋集團特別設立了生態專業公司。遠洋生態緊隨國家戰略，將工匠精神 and 綠色智慧融入生態修復實踐過程中。公司將以此項目爲契機，繼續加強與院士工作站的深度合作，提升集團市場競爭力，爲實現“青山綠水”，建設“美麗中國”而努力！

2019 年，遠洋生態以 PPP、EPC 項目模式涉足水生態治理業務，成功獲取並順利實施了上饒櫛溪河綜合治理項目、石家莊市滹沱河生態景觀（二期）工程施工四標段項目、青島市即墨區墨水河—龍泉河城區段水生態治理工程、北京 CBD 城市森林公園建設項目、北京市延慶區京藏高速（八達嶺林場段）沿線景觀提升工程等生態環境建設項目，爲生態文明建設做出了自己的貢獻。

遠洋生態是遠洋集團旗下，以風景園林規劃設計、工程建設、生態環境修復、生態城鎮綜合開發爲主營業務的專業服務平台，專注於爲客戶提供集研發、設計、建設和運營於一體的解決方案，打造具備核心資源要素的生態環境運營服務商。

Since the 18th CPC National Congress, the PRC has incorporated ecological civilization construction into the overall layout of the socialist cause with Chinese characteristics, deeming ecological civilization construction as an integral part of the overall layout of the "Five in One" and further indicating the key strategic position of ecological civilization. Sino-Ocean Group has specially set up an ecological professional company. In line with the national strategy, Sino-Ocean Ecology incorporates craftsmanship and green wisdom into the process of ecological restoration. The Company will take this project as an opportunity to continue to strengthen in-depth cooperation with academician workstations, enhance the Group's market competitiveness, and make more efforts to achieve "green mountains and clean water" and build a "beautiful China".

In 2019, Sino-Ocean Ecology was engaged in the water ecological treatment business under PPP and EPC models, successfully acquired and implemented ecological construction projects such as Shangrao Zhuxi River Comprehensive Treatment Project, Shijiazhuang Hutuo Rider Ecological Landscape (Phase II) Construction Four Bidding Section Project, Qingdao Jimo District Moshui Rider- Longquan River Urban Section Water Ecological Treatment Project, Beijing CBD Urban Forest Park Construction Project, and Landscape Improvement Project along Beijing-Tibet Expressway (Badaling Forest Farm Section) in Yanqing District, Beijing, making its own contribution for ecological civilization.

Sino-Ocean Ecology is a professional service platform engaged in landscape planning and design, engineering construction, ecological environment restoration and comprehensive development of ecological towns. It is a subsidiary of Sino-Ocean Group, focusing on providing customers with a solution that integrates research and development, design, construction and operation with an aim to build an ecological environment operation service provider with core resource elements.

與受影響社區的溝通是有效支持社區發展的基礎。我們通過多渠道與不同層面社區保持有效溝通，如通過集團自媒體公開收集客戶及受影響社區需求與意見；遠洋之帆通過回訪調研了解受助群體的真實情況，遠洋會專員根據業主線上提交的信息分析需求來提供對應服務等。

而最高效的溝通方式之一是鼓勵社區成員參與到項目本身，2019 年度，集團共直接帶動 8,196 位志願者付出了 60,486 小時的志願服務，其中包括客戶、員工、合作夥伴等利益相關方。

Communication with affected communities provides the basis for effectively supporting community development. We maintained close ties with communities at different levels through various channels. For example, we collected information about customers' and local communities' needs and opinions through the Group's social media accounts; the Sino-Ocean Charity Foundation gained a deeper understanding of the real situation at donation-receiving communities through surveys and follow-up visits; and members of the Sino-Ocean Club adapted our services based on analysis of information submitted by property owners online.

The most effective method of communication has been to encourage community members to participate in projects. In 2019, we enlisted 8,196 volunteers including customers, employees, partners and other stakeholders, spending a total of 60,486 hours in volunteer services.

綠色健康社區

GREEN HEALTHY COMMUNITIES

● 公益品牌項目 PUBLIC WELFARE BRAND PROJECT

遠洋集團自 1993 年成立伊始，即積極投身於社會公益事業，持續踐行社會責任。2008 年，於北京市民政局正式設立北京遠洋之帆公益基金會，有序推進公益事業，組織志願者積極參與社會公益事業。2010 年，爲進一步統籌集團社會責任履行、社會捐贈行爲，制定《公益慈善性社會捐贈管理規範》、《公益慈善性質社會捐贈操作工作指引》等文件，同步集團責任履行意識，規範化慈善行爲及相應流程。

經過多年運作，遠洋集團對外捐贈總額超過 1.2 億，遠洋之帆公益基金會平台也已孕育出多個公益品牌項目，集團正以此爲平台，帶領城市公司、專業公司、合作夥伴、客戶等，積極投身於公益慈善事業，爲健康社區、社會共同努力。

Since the establishment of Sino-Ocean Group in 1993, it has actively devoted itself to social charity and continued to implement social responsibilities. In 2008, Beijing Sino-Ocean Charity Foundation was officially established in the Beijing Municipal Civil Affairs Bureau to promote charity in an orderly manner and organize volunteers to actively participate in charity. In 2010, in order to further coordinate the Group's social responsibility fulfillment and social donation behaviors, we formulated the "Public Charity Social Donation Management Regulations" and "Public Welfare Social Donation Operation Guidance" and other documents to synchronize the Group's responsibility fulfillment awareness, standardize charitable behavior and corresponding process.

After years of operation, the total amount of external donations of Sino-Ocean Group has exceeded RMB120 million, Sino-Ocean Charity Foundation has also cultivated a number of charity brand projects. The Group is using this as a platform to lead city companies, professional companies, partners, customers, etc. to actively participate in public welfare and charity, and work together for a healthy community and society.

遠洋健康（環保）公益計劃 SINO-OCEAN HEALTH (ENVIRONMENTAL PROTECTION) CHARITY PROGRAM

2019 年，4 月 22 日，遠洋之帆公益基金會理事長李建波在第三屆“遠洋益跑”首跑活動現場宣布正式啓動了“2019 遠洋健康（環保）公益計劃”。該項目除了包括一年一度的“遠洋益跑”外，還在今年首次設立 100 萬元的“遠洋建築·健康基金”，用以支持社區、鄉村或城市開展建築健康活動及相應建設。

On April 22, 2019, Li Jianbo, Chairman of the Sino-Ocean Charity Foundation announced the official launch of the "2019 Sino-Ocean Health (Environmental Protection)

Charity Program" at the scene of first event of the third "Ocean Marathon". In addition to the annual "Ocean Marathon", "Sino-Ocean Building · Health Fund" with initial capital of RMB1 million was established for the first time this year to support communities, villages, or cities to conduct building health activities and relevant development.

遠洋建築健康基金 SINO-OCEAN BUILDING HEALTH FUND

2019年遠洋健康公益內涵再升級，今年首次設立100萬元的“遠洋建築·健康基金”，用以支持重點城市和鄉村開展圍繞建築健康、環境健康方向的建設。

2019年3月，海南分公司向基金會提交方案以申請建築健康基金，用來進行大茅村自然生態館改造及大茅村生態堆肥試驗。

大茅村的美麗環境要求平衡建築和環境之間的關係，園林垃圾回收利用和污水沉澱池就是具體表現之一。這些生態舉措可用於處理可循環垃圾，有助於發展循環生態建設，以有效地滿足鄉村經濟生態發展的需求。大茅村已構建“自然博物教育”框架，IP培育“中國自然博物第一村”。相關的健康基金投入方案還在持續升級。

建築健康基金可以促進集團“建築·健康”理念全面落地，樹立“遠洋健康”公眾形象，廣泛傳播“建築·健康”定位及理念。

In 2019, the Sino-Ocean Health Charity Program was upgraded. In the year, the RMB1 million of "Sino-Ocean Building Health Fund" was established for the first time to support the development of building health and environmental health in key cities and villages.

In March 2019, the Hainan branch submitted a proposal to the foundation to apply for a building health fund, which intended to apply in carrying out the renovation of the Damao Village Natural Ecological Museum and the Damao Village Ecological Composting Pilot Project. The beautiful environment of Damao needs a balance between the building and the environment. Garden waste recycling and sewage sedimentation ponds are the concrete examples. These ecological measures can be taken to dispose of recyclable waste and help to develop a cycling ecological system to effectively meet the needs of rural economic and ecological development. Damao Village has established a "natural museum education" framework, and cultivated the IP of "No. 1 village of natural museums in China". The related health fund investment program is still being upgraded.

The building health fund enables us to promote the full implementation of the Group's "Building Health" concept, create a public image of "Healthy Sino-Ocean", and widely spread the positioning and concept of "Building-Health".

第三屆遠洋益跑 THE THIRD OCEAN MARATHON

本屆“遠洋益跑”在活動場地設置了一面“BUILDING HEALTH”（“建築·健康”）圖案的創意塗鴉牆，每一位跑者都可在這一充滿個性標籤的牆面繪製自己心中的“健康色彩”，共同構築“建築·健康”的美好圖景。同時，在2KM與4KM處設置跳繩與折返跑打卡環節，用互動為跑者帶來獨特健康體驗。

遠洋益跑是遠洋健康公益計劃的主要載體，參賽者完成指定公里數後，將由遠洋集團捐出公益金用於公益項目，自2017年首屆舉辦以來已獲得諸多城市公司及共益夥伴的支持。

2019年全國共有13個城市公司參賽，超過3,000名志願者積極參與，參與者有遠洋的員工、客戶、遠洋社區業主、合作夥伴等等，所有參與者每完成指定路程5km的益跑，遠洋集團便會為山區孩子捐出30元助學金，為“小夥伴成長計劃”資助的學生提供助學金和有聲讀物。

A creative graffiti wall with a "BUILDING HEALTH" pattern was erected at the venue the Ocean Marathon. Each runner was expected to draw his own "healthy colors" on this wall, and jointly create a beautiful picture of "BUILDING HEALTH". In addition, skipping ropes and time recording link for shuttle run are set up at 2KM and 4KM to provide a unique healthy experience for runners through interaction.

Ocean Marathon is the main platform of the Sino-Ocean Health Charity Program. After the participants have completed the specified number of kilometers, corresponding donations are made by Sino-Ocean Group for public welfare projects. Since its debuting in 2017, it has received support from many companies and partners.

In 2019, a total of 13 companies participated in this campaign across the country, with more than 3,000 volunteers participated in actively. Participants included Sino-Ocean's employees, customers, Sino-Ocean's community owners, partners, and so on. A donation of RMB30 would be made by Sino-Ocean Group to the children in the mountainous areas if participants completed the 5km charity marathon on the specified route, and student grant and audio books would be provided to the students under the "Little Partner Education Sponsorship Scheme".

老社區，新綠色²⁴ OLD NEIGHBOURHOOD GREENING²⁴

2019年，“老社區·新綠色”環保公益活動作為遠洋健康公益計劃的特別活動在石家莊拉開帷幕，在石家莊各個小區共開展5季活動。用綠色行動走進老舊小區，以實際行動改變舊城以煥新顏。用健康生活家的理念，帶給城市更多改變。

In 2019, "Old neighbourhood Greening environmental-protection public welfare activity", as a special event of the Sino-Ocean Health Charity Program, kicked off in Shijiazhuang, and a total of 5 sessions of activities were held in various communities in Shijiazhuang. We renovate the old community with our greening action and rejuvenate the old city with our concrete action to bring more change to the city with the concept of healthy living home.

通過社區塗鴉、垃圾分類知識講座、跳蚤市場、遠洋社區圖書角、家庭整理課堂、落葉堆肥知識等活動，提高老舊小區的生活環境和人文環境，改善居住環境並提升居住者的幸福感，讓每個人都成為健康生活家。

Living environment and human environment of the old community are improved through community graffiti, garbage sorting knowledge lectures, flea markets, Sino-Ocean community book corners, home tidy-up classes and knowledge on fallen leaves composting, thus improving the happiness of residents and making everyone have a healthy living home.

除集團層面，我們也鼓勵在各地的集體和個人，發起或參與社區活動。通過2012年起設立的「遠洋社會責任風尚獎」的歷年舉辦情況，已經呈現出越來越多各地項目活動在更多的社區生根發芽。

In addition to group-level campaigns, we encourage local teams and employees to organize and participate in community activities. The evolution of the "Responsible Role Model of Sino-Ocean" awards, which was established in 2012, over the years indicates that an increasing number of local community events have been held by Sino-Ocean teams at different levels.

24. 「老社區，新綠色」行動針對老舊社區，圍繞水資源多渠道利用和節約、鄉土植物栽種推廣、可再生資源利用和節能減排等主題建立環保改善或改造示範項目和組織環境宣傳教育活動，共在17個省市800多個社區開展，至少4,000萬人因活動受益。

24. 26. The "Old neighbourhood Greening" environmental protection charity campaign was launched in 2006. The campaign is aimed at old communities, through which environmental improvement or renovation demonstration projects were developed and environmental education activities were organized in respect of the aspects of multi-channel utilization and conservation of water resources, promotion of native plant cultivation, renewable resource utilization, energy conservation and emission reduction in more than 800 communities in 17 provinces and cities, with at least 40 million people benefited from the campaign.

The "Little Partner Education Sponsorship Scheme" (formerly known as "Connecting Hands and Hearts" Education Aid Scheme), is a core project founded by the Sino-Ocean Charity Foundation, which comprises of grant funds, scholarships, care funds, Singing for Love and inheritance of national culture projects. Until now, the foundation has funded over 60,000 students in more than 76 schools, and has donated "100,000 Whys" and "Five Thousand Years of Chinese Nation" books to 17 schools and funded the construction of book corner for minority schools in the impoverished area and gave more children opportunity to get out of the mountains and enter the city, and understand and master the Chinese national culture.

“愛唱響”民族文化傳承 “SINGING FOR LOVE” ETHNIC CULTURAL HERITAGE PERFORMANCE FUND

“愛唱響”系列公益活動於2014年首度開展，旨在延續遠洋對精神品質一貫追求的同時，以音樂和藝術為切入點為邊區孩子架起通往外面世界的橋樑，表達專注於改變基礎教育發展不均衡的持續態度和行動。2017年起，建立“愛唱響”民族文化傳承展演基金，扶持、鼓勵更多民族文化項目傳承和傳播。2019年，共有2所學校項目申請4.3萬元文化展演基金，並在青海、海南各地實現民族文化展演。

小公民創新公益項目 LITTLE CITIZEN INNOVATION PUBLIC WELFARE PROJECT

“小公民”創新公益活動由“園丁獎”項目演化而來，2016年與中國少年兒童新聞出版總社、《輔導員雜誌社》合作正式設立。該活動倡導全社會關注少年兒童“小公民”責任意識的培養，鼓勵少年兒童以兒童的視角發現問題，提出問題，解決問題，促進少年兒童用愛心與公益行動去影響成人世界，為社會盡一份“小公民”的力量，用實際行動去踐行社會主義核心價值觀。

Formerly known as the “Teachers Awards,” the “Little Citizens” Innovation Charity Project was co-founded by China Children’s News Press and “Instructor” magazine in 2016 to promote the engagement of children and teenagers in social work as “little citizens,” and encourage them to identify and solve problems from their own perspective. The ultimate goal is to let children influence adults through good deeds and make their own contributions to social development, promoting core socialist values among China’s younger generations.

2019年，遠洋之帆公益基金會特別設立“小公民微課堂”公益教育項目，鼓勵城市學生將自己所掌握的學識與技能，通過錄製自拍教學視頻，以設立網絡專題視頻庫和U盤的形式分享給山村孩子，將城市與山村聯結。一方面給予城市孩子展示所學技藝的平台，展現當代小學生勇於創新、積極向上的精神面貌，從小培養孩子們的公益心。另一方面滿足山村孩子對文化多層次的需求，讓更多孩子有機會接觸到不同的課程體驗、不同的學習方法、不同的文化差異，幫助孩子打開視野，為未來走向社會打下思想的基礎。

小公民“微課堂”項目啓動以來，共徵集了50+個作品，獲得了126,312個點讚，孩子們用行動支持了這些優秀的“微課堂”。除此之外，遠洋之帆公益基金會還在暑假舉辦了落地“微課堂”——小公民民族文化夏令營。基金會跨越2629公里的距離，將北京、香港以及海南黎族的小公民們齊聚一堂，讓孩子們現場展示自己的“微課堂”同時感受大茅遠洋生態村的自然魅力。

In 2019, the “Little Citizens Micro Class” Charity Education Project was founded by the Sino-Ocean Charity Foundation to encourage urban students to use their knowledge and skills and record their teaching videos in online video library and USB flash disk to share them with the children living in mountain village and establish connection between the cities and the mountain villages. On the one hand, it provides a platform for urban children to display their skills, presents the spirit of innovation and positive spirit of contemporary elementary school students, and cultivates children’s charity mindset from an early age. On the other hand, it caters to the multiple needs of children in mountain villages, makes more children accessible to different curriculum experiences, different learning methods, and different cultures, helping children to open their horizons and lay a foundation for their future.

Since the launch of the “Little Citizens Micro Class” project, a total of 50+ works have been solicited with 126,312 likes by followers. Children acted to support these outstanding “Micro Classes”. In addition, the Sino-Ocean Charity Foundation also organized a “Micro Class”-- Little Citizens National Culture Summer Camp during the summer holiday. The foundation brought together small citizens from Beijing, Hong Kong and the Li nationality in Hainan spanning a distance of 2,629 km, they were encouraged to show their “Micro Class” on the spot and feel the natural charm of Damao Sino-Ocean Eco Village.

今年的99公益日，遠洋之帆又組織小公民們積極參加“小小公益傳播官”活動，孩子們各自組隊為公益而戰在活動期間為“小夥伴秋季助學金”募捐宣傳。小夥伴秋季助學金將為每位貧困的山區孩子提供每學期500元的學費或生活費。99公益日活動的3天，小公民們共計24支戰隊組隊參與，約217人參加了活動並輻射4,179顆愛心，並最終籌得23,796.34元善款。

On September 9 Charity Day in the year, Sino-Ocean Charity Foundation also organized little citizens to actively participate in the “Little Charity Ambassadors” activity, and the children teamed up to make their contributions for public welfare, in which they advertised the “Little Friends Autumn Scholarship” donation activity. We provided tuition or living expenses of RMB500 per semester to students from mountain villages through the “Little Friends Autumn Scholarship”. In three-day event, a total of 24 teams with about 217 little citizens participated in, which received 4,179 donations, and raised RMB 23,796.34.

功勳老人關懷

CARING FOR VETERANS

● 公益品牌項目

PUBLIC WELFARE BRAND PROJECT

中國脊梁健康支持計劃 CHINA BACKBONE HEALTH CARE PLAN

「中國脊梁健康支持計劃」是遠洋之帆為對國家和民族做出特殊貢獻的特定老人設立的健康專項計劃。該項目於 2015 年設立，設立之初即聯合海醫匯等醫護資源對河北赤城老兵提供健康支持和關懷，並通過公眾募捐設立專項基金定向支持該項目運行。目前該項目已經連續運行 5 年。

The "China Backbone Health Care Plan" was a special elderly-care project introduced by the Sino-Ocean Charity Foundation in 2015 to support senior citizens who have made significant contributions to the country. We provided health care and support to veterans in Chicheng, Hebei, in collaboration with Sino-Ocean Health In Here and other long-term partners. Public donations were collected via a special fund to fund related operations. The program has been operated for 5 years in a row.

2019 年，攜手共益夥伴泰和泰律師事務所（北京）黨支部、遠洋集團總部黨支部以及北京中小學生代表，實現了 50 位老兵的定向資助，通過與赤城志願者聯盟及海醫匯的合作，全年進行 2 次健康探訪和慰問，送去來自廣大愛心人士的捐贈、關懷和問候。

In 2019, together with the partner Tahota Law Firm (Beijing) CPC Branch, Sino-Ocean Group Headquarters CPC Branch, and representatives of primary and middle school students in Beijing, we provided targeted donations for 50 veterans. Through cooperation with Chicheng Volunteer Union and Sino-Ocean Health In Here, we carried out two health visits and condolences activities throughout the year, and donations, care and greetings from many charitable people were conveyed to them.

由於年紀大了，以及生活窘迫，每年春冬兩季，老兵們都在陸續離開。為能讓老兵們在身後留下更多紀念，為讓更多人了解他們堅定的信念、他們曾經的事跡，在新中國成立 70 周年之際，遠洋之帆公益基金會組織完成了《不要懂的太晚 愛的太遲——中國脊梁健康支持計劃手冊》編寫，記錄了走訪老兵們的事跡、話語；完成了《永不褪色的記憶——慶祝新中國》視頻記錄及剪輯，用鏡頭留下他們的音容笑貌，為後世人們留下一段驚心動魄、卻令人敬佩的歷史。

Due to the age and distress of life, veterans passed away one after another in spring and winter. In order to allow veterans to leave more memory behind them, and to let more people understand their firm beliefs and their past deeds, during the 70th anniversary of the founding of PRC, the Sino-Ocean Charity Foundation completed the compilation of the "Not Too Late To Love -Manual for China Backbone Health Care Plan", which recorded the deeds and words of visiting veterans; completed the video recording and editing of "Never-fading Memory-Celebrating the founding of PRC", which recorded their smiles with the lens and left a thrilling but admirable history for future generations.
